

Gene Mancino

Since 1979, Gene Mancino has successfully concluded a broad range of search assignments exclusively in the life sciences industry. Clients have included international pharmaceutical corporations as well as emerging biotechnology companies. Gene is qualified to advise both development stage and fully integrated biopharma companies with respect to operational management, strategic leadership and corporate governance. Gene has been a seed investor in, and respected Advisor to, multiple life sciences companies and venture capital funds as well as held numerous Board seats. Gene is currently a Limited Partner at Mediphase Venture Partners. Gene is an active participant on panels for BioNJ and NewYorkBIO. Most recently he was a panel member during the BIO Career Fair at the 2015 BIO International Convention in Philadelphia.

Gene's corporate development and investment network is well established in the industry. Gene is a founding Partner in the life sciences search firm of Mancino Burfield Edgerton. His practice specialty is executive management including Board Directors, Chief Executive Officer, President, Chief Operating Officer, Chief Business Officer, VP and Director's of Business Development, Sales & Marketing, Clinical/Medical Affairs, Human Resources and Legal.

Gene's industry experience has made him an excellent resource for recruiting management teams, Board Members and as a Business Advisory Consultant to his clients and candidates. Gene also provides personalized outplacement services and executive coaching to transitional candidates.

Prior to Mancino Burfield Edgerton, Gene worked for Procter & Gamble. Gene earned an AB degree from Princeton University – Class of 1978.
