
MANCINO BURFIELD EDGERTON

GENE MANCINO

Gene Mancino has been at the forefront of life sciences executive search for more than 25 years, with clients ranging from top ten pharma corporations to the leading portfolio companies of the US and international venture capital communities. Gene is qualified to advise both development stage and fully integrated biopharma companies with respect to operational management, strategic leadership and corporate governance. Gene has been a seed investor in, and respected advisor to, multiple life sciences companies and venture capital funds. Gene is currently a Business Advisor to Creative BioVentures LLC and Granite Pharmaceuticals. He is a Board Member at Juvaris BioTherapeutics located in San Francisco and a Limited Partner at Mediphase Ventures Partners and Taravel Associates LLC. He is also a seed round investor at Juvaris BioTherapeutics. He was formerly an Advisor to Aventis Capital. Gene is frequently asked to participate on panels at various life science industry meetings. For example, Biotechnology Council of New Jersey, New York Biotechnology Association and Biotechnology Investor Today.

Gene's corporate development and investment network is well established in the industry. Gene is a founding partner in the life sciences search firm of Mancino Burfield Edgerton where his practice specialty is executive management including Board Directors, Chief Executive Officer, President, Chief Operating Officer, Chief Business Officer, VP's of Business Development, Sales & Marketing and Clinical/Medical Affairs.

Prior to Mancino Burfield Edgerton, Gene worked for Procter & Gamble. Gene earned a BA degree from Princeton University.

Gene, his wife and two daughters are residents of Belle Mead, NJ.
